

LIQUID CRYSTAL DISPLAY MODULE

ABSTRACT OF THE DISCLOSURE

A liquid crystal display module is provided. The LCD module includes a liquid crystal display body, a base having a first frame, a cover having a second frame for covering the base, a plurality of mounting openings mounted on an outer wall of the second frame, a plurality of indentations positioned at a bottom surface of the second frame, a plurality of protrudent elements mounted on an outer wall of the first frame for being engaged with the plurality of mounting openings so as to secure the engagement between the first frame and the second frame, and a plurality of blocking elements mounted at a bottom surface of the first frame for preventing the bottom surface of the second frame from being pressed over the bottom surface of the first frame.
